SUMMARY

I'm a Software Engineer currently studying at the University of the People, driven by a passion for innovative solutions that push technology's boundaries. Proficient in Python, JavaScript, C++, and Java, I excel in both front-end and back-end development. My software engineering journey includes hands-on work with a range of web frameworks: Next.js (React), SvelteKit (Svelte), Vue.js, Django (Python), Ruby on Rails, and Express (Node.js). This experience has honed my ability to craft dynamic, user-centric web applications that seamlessly leverage modern technologies.

EDUCATION

Technological High-School

Technical Diploma with Beyond High School Equivalency
2020 - 2022

Mandalay Technical Institute

Note: Studies interrupted due to political circumstances.
2020 - 2022

University of People

Bachelor of Computer Science
2020 - 2022

React : Proficient in React, I adeptly craft dynamic user interfaces.

Nextjs : With latest next 13 app directory, I can create fast and scalable React apps with server-side rendering.

Express : Seasoned with Express, I architect and deploy efficient server-side applications and powerful api.

Django : Proficient in Django, I develop robust and fast web applications with Python.

Svelte : Skilled in Svelte, I craft efficient and lightweight web components for modern UIs.

Svelte Kit : Specializing in SvelteKit, I create highly optimized and dynamic web applications with SSR.

Vue : Adept with Vue.js, I excel at building interactive and dynamic front-end experiences.

Ruby on Rails : Experienced in Ruby on Rails, I create elegant and feature-rich web applications.

PORTFOLIO

Job-seeking and Freelancing Platform

 <https://kazeki.vercel.app/>

 <https://github.com/zaiYellYintAung/kazeki-next13>

Engineered a game-changing job seeking and freelancing platform using **Next.js 13**, leveraging its latest web development advancements. Seamlessly responsive and fortified with **role-based authentication** through **Next-auth**, ensuring dynamic user experiences for clients and job seekers.

Productivity app with project management feature

 <https://kioku.vercel.app/>

 <https://github.com/zaiYellYintAung/kioku-next13>

Pioneered a robust productivity app adorned with **Next.js 13**, boasting an elegant UI. Seamlessly integrating **task management**, **note-taking**, **habit-tracking**, **journaling** and **goal-setting** functionalities, I harnessed the power of **Next-auth** to ensure secure access and engagement.

My Personal Website

 <https://zaiyellyintaung.github.io/>

 <https://github.com/zaiYellYintAung/zaiYellYintAung.github.io>

Built a captivating personal website with **Svelte**, adorned by the sleekness of **Tailwind CSS** and the trendiness of **Shadcn-UI**. Elevating its allure, I infused **Three.js** for captivating 3D features, resulting in a modern and elegantly designed platform.
